

WE ARE
INNOVATORS
WE ARE
MAKERS
**WE ARE
DREAMERS**

The image features a black background with several yellow, crystalline, cone-shaped structures. These structures have a rough, textured surface and are scattered across the frame. In the foreground, there are small, clear, faceted crystals, possibly salt, scattered on a dark surface. The lighting is dramatic, highlighting the yellow structures against the dark background.

WHEREVER YOUR VISION
TAKES YOU, THAT'S WHERE
WE ARE HEADED.

NICE TO MEET YOU

The innovator: Alessio, the one who brought a forward-looking approach to the company.

The maker: Domenico, our founder, the one who made his own vision a reality.

The dreamer: Erika, who added some fresh ideas to what we do.

We are a company made up of forward-thinking, dynamic professionals who deeply value the human element in technology.

We dream up, design, and manufacture flow pack machinery from scratch, cooking up every single component to meet the specific needs and requirements of our clients, and we have been doing this for over 40 years.

We constantly engage in research and development to come up with groundbreaking technical solutions, higher levels of customization and sustainable processes.

We strive to push our imagination a little further every time to provoke, innovate, astound, and make your projects come alive.

WE ARE MAKERS.
WE ARE DREAMERS.
WE ARE TLM.

TURNING GREAT IDEAS INTO SOLID REALITIES TAKES
VISION, EXPERTISE, AND AN ADVENTUROUS SPIRIT.

MEETING YOUR NEEDS IS OUR KEY TO INNOVATION AND IMPROVEMENT

Because customer satisfaction is a major factor in the improvement of our products, we have developed an airtight process to provide our clients precisely with they need.

ANALYSIS

We carry out a proper analysis of our clients' needs, even offering them the opportunity to view a sampling of their products.

DESIGN

We leverage 3D technology to design our machinery in order to define every product down to the smallest detail.

MANUFACTURING

The machine is then assembled by a highly specialized team that follows every step of the process.

TESTING

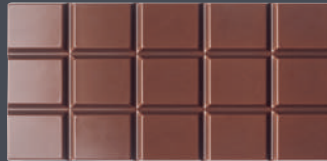

Before shipment, each machine is tested with the products and the wrapping materials supplied by the client to assess its performance and make sure it meets all the necessary technical specifications.

INSTALLATION

When required, our technical staff is available for intervention worldwide, offering full reliability and competence during the production start-up.

WIKI

COMPACT, VERSATILE, READY FOR ACTION

Discover WIKI, the compact flow pack machine designed for small spaces! WIKI offers high performance despite its reduced size, ensuring high-quality packaging in limited spaces. It is the perfect choice for single-dose, small-sized products, maintaining product integrity and freshness thanks to advanced technology and an integrated cooling system. WIKI combines versatility and efficiency, optimizing packaging processes even in the most confined production environments. Choose WIKI for compact, reliable, and high-performing packaging.

EKO

EFFICIENCY THAT ADAPTS TO YOU

Enter the world of flow pack packaging with EKO! Designed as a high-performance entry-level model, EKO offers Italian quality and advanced technology at an accessible price. Capable of handling reels up to 400 mm wide, EKO is ideal for various food and non-food applications. With its intuitive touchscreen, even less experienced operators can manage settings easily. Compact and ergonomic, it optimizes production space while ensuring reliable and flexible packaging operations. Choose EKO to combine performance, practicality, and the excellence of Made in Italy design.

FUTURA

TECHNOLOGY THAT ANTICIPATES THE FUTURE

Discover the FUTURA flow pack machine: the perfect balance between advanced technology and mechanical engineering! FUTURA features a dynamic former that allows quick format changes with minimal manual adjustments, while other settings are saved and recalled via the touchscreen. This system ensures fast, intuitive format transitions. High-end electronics and solid mechanical construction guarantee reliability. The innovative bag-forming system delivers perfect, elegant packages for a wide range of applications. FUTURA simplifies your packaging process, ensuring safety, flexibility, and top performance.

DYNAMIC

THE SMART CHOICE FOR EVERY NEED

Discover DYNAMIC, the flow pack machine tailored to your needs! DYNAMIC is designed to integrate into production lines, achieving high speeds and optimizing productivity. Its structure allows seamless integration with automatic loaders, making packaging operations fast and efficient. DYNAMIC's flexibility stands out, offering customizable solutions that adapt perfectly to different production requirements. Switch between formats easily, maintaining high precision and reliability. Choose DYNAMIC to bring your packaging process to a new level of performance and efficiency.

GENESI

HIGH-SPEED INNOVATION

Discover GENESI, the new frontier in flow pack packaging. Designed to deliver high performance on any automatic line, GENESI combines speed, precision, and versatility in a compact and technologically advanced solution. Thanks to its high-performance system, it can reach high production speeds while maintaining consistent packaging quality. Its modular and configurable design quickly adapts to multiple formats, ensuring intuitive format changes and continuous operation. Perfectly suited for integration with automatic feeders, GENESI is the ideal choice for those seeking efficiency, reliability, and productivity. With GENESI, every pack reflects innovation, control, and performance.

DOGMA

Designed for 100% paper film

THE CONCEPT THAT REDEFINES FLOW PACK

Experience DOGMA, the future of sustainable flow pack packaging! Designed to work with 100% paper films, DOGMA offers an innovative solution for eco-friendly packaging. Its unique Long Touch sealing system ensures perfect sealing even with thick paper films, maintaining product quality and safety. Despite using sustainable materials, DOGMA delivers high performance and production speeds, making it ideal for intensive manufacturing environments. Combine innovation, reliability, and sustainability without compromise with DOGMA – and take a step towards greener packaging solutions.

SPEEDY

UNCOMPROMISING SPEED

Discover SPEEDY, the ultra-fast flow pack machine designed for maximum customization and performance. Engineered to adapt to specific production needs, it delivers exceptional speed, flexibility, and reliability. SPEEDY handles a wide range of products and formats while maintaining top-quality results, even at over 200 packs per minute. Its dynamic design meets evolving market demands, making it ideal for high-volume lines requiring efficiency and continuous operation. Perfect for integration with automatic feeders, SPEEDY ensures consistent, flawless packaging from start to finish. A tailor-made solution for those who need speed, precision, and adaptability in one compact, powerful system.

INFINITY

TOTAL EFFICIENCY, INFINITE PERFORMANCE

Meet INFINITY, the flow pack machine designed for high-speed, high-volume packaging! INFINITY features a revolutionary long touch sealing system, delivering perfect hermetic sealing even with thicker films. Its automatic reel changer minimizes downtime, ensuring continuous and efficient production. Specifically engineered for integration into packaging lines, INFINITY guarantees smooth and steady operations even under intensive conditions. With advanced technology and exceptional reliability, INFINITY is your best ally to maximize efficiency and optimize every stage of your packaging line.

DISCOVERY

THE NEW FRONTIER OF PACKAGING

Discover the DISCOVERY flow pack machine: versatility and innovation in your packaging! Equipped with a BOX MOTION sealing system, DISCOVERY ensures perfect hermetic sealing, ideal for modified atmosphere packaging and thicker films. Available with either pusher loading or continuous belt loading, it adapts to different product types, including irregular or delicate ones. Designed for medium to large items, DISCOVERY offers exceptional flexibility across various industries. Elevate your production efficiency with a solution that brings reliability and performance to every packaging challenge.

DISCOVERY BB

VERSATILITY AND INNOVATION FOR EVERY FORMAT

Explore DISCOVERY BB with bottom reel loading: flexibility and innovation combined! DISCOVERY BB inherits the strengths of the standard version, enhanced with a continuous belt feeding system ideal for handling irregular, lightweight, or heavy products. The belt gently guides items into the film, ensuring a smooth, continuous packaging flow. Thanks to barrier photocells, the bag length automatically adjusts to the product size. With BOX MOTION sealing technology, DISCOVERY BB provides excellent hermetic sealing, making it perfect for modified atmosphere packaging and products with varying shapes.

GOLIATH

ROBUST, TIRELESS, READY FOR THE CHALLENGE

Meet GOLIATH by TLM: the ultimate solution for oversized and challenging products! Entirely designed and built in Italy, GOLIATH is the largest flow pack machine ever created in our range — and beyond. It handles films up to 900 mm wide, products up to 185 mm high, and 420 mm wide, ensuring impeccable packaging even for complex applications. Built to excel across the food, industrial, medical, and non-food sectors, GOLIATH redefines performance, precision, and adaptability. Raise your packaging standards with GOLIATH.

PRIME

COMPACT TECHNOLOGY, SMART FLEXIBILITY

Optimize your packaging process with our PRIME model! The PRIME flow pack machine is designed to ensure efficiency and convenience when packaging products up to 10 cm high, with bag lengths reaching up to 2 meters. Thanks to its compact size, it fits perfectly into any production space. The practical 45-degree loading system ensures ergonomic and intuitive operations, ideal for loose or single products. Operators can load products, start the machine manually, with a pedal, or through an automatic timed system. Bag length adjustments are quick via the touchscreen, streamlining format changes without interruptions. PRIME offers flexibility and reliability with BOPP, coextruded films, aluminum, and paper.

MICRO

VERTICAL AND EFFICIENT, READY FOR INTEGRATION

Discover MICRO, the compact vertical packaging solution! MICRO is designed for vertical packaging applications, combining high performance and ease of use. It works perfectly with automatic loading systems, delivering great results even at high speeds. Ideal for loose products such as snacks, pasta, pet food, or multipacks, MICRO's compact design makes it easy to integrate into space-limited production areas. Reliable, flexible, and user-friendly, it adapts to a variety of applications without compromising on efficiency or quality.

AUTOMATIC FEEDER

SMART AUTOMATION FOR UNMATCHED PRODUCTIVITY

TLM's Automatic Feeder is the ideal solution for automating product loading with maximum precision and efficiency. Designed to minimize operational errors, it integrates seamlessly into production lines, improving process speed and continuity. Leveraging years of experience, we deliver tailored systems that handle a wide range of products and formats. When combined with high-performance machines like Infinity, Discovery, Speedy, and Dynamic, our feeders ensure reliable, high-speed packaging. Choose TLM to elevate your production efficiency and performance.

5 STEPS FOR A GREENER FUTURE

AT TLM, WE BELIEVE THAT IT IS CRUCIAL TO OWN RESPONSIBILITY FOR OUR ENVIRONMENTAL IMPACT. THAT IS WHY WE HAVE EMBRACED A SET OF RESPONSIBLE POLICIES SUCH AS RE-DESIGNING OUR MACHINES TO REDUCE THE FOOTPRINT DERIVED FROM PACKAGING.

1. ECO-FRIENDLY PACKAGING

We are working side by side with our partners to make our packaging more and more eco-friendly and plastic-free, compatibly with our products and market requirements.

2. WASTE REDUCTION

As a company, we embrace a no-waste approach which includes cutting down on electricity consumption and promoting a sustainable printing policy that minimizes paper consumption.

3. RENEWABLE ENERGY

To improve our energy efficiency, we have installed solar panels on the roof of our headquarters building. This allows us to produce our own sustainable energy from sunlight on a daily basis.

4. REFORESTATION

We are planning to create a wooded area of about 8.000 sqm facing our headquarters. This intervention is part of a sustainable project promoting CO² reduction and will be completed very soon.

5. SUSTAINABLE TECHNOLOGY

Our R&D department is constantly working to conceive and perfect cutting-edge technologies with a sustainable core, promoting a green transition for the whole company.

At TLM, we design, engineer, and manufacture every flow pack machine entirely in Italy, taking care of every single detail.

Each machine is the result of true craftsmanship, born from a passion for Italian know-how and a complete production process that starts from the concept and leads to the creation of every component.

By combining traditional craftsmanship with the innovation of Industry 5.0, we deliver technologically advanced solutions tailored to our clients' specific needs. Choosing TLM means choosing the excellence of true Made in Italy, where expertise, customization, and cutting-edge technology come together in every project.
